

**National Interagency Coordination Center
Incident Management Situation Report
Tuesday, October 3, 2017 – 0530 MT
National Preparedness Level 2**

National Fire Activity

Initial attack activity: Light (103) new fires
 New large incidents: 1
 Large fires contained: 1
 Uncontained large fires:** 6
 Area Command teams committed: 0
 NIMOs committed: 0
 Type 1 IMTs committed: 1
 Type 2 IMTs committed: 9

**Uncontained large fires include only fires being managed under a full suppression strategy.

Southern Area (PL 5)

New fires: 69
 New large incidents: 0
 Uncontained large fires: 0
 Type 1 IMTs Committed: 1
 Type 2 IMTs Committed: 6

Hurricane Maria Puerto Rico, Federal Emergency Management Agency (FEMA). IMT 1 (McGowan) has been tasked with establishment of an incident support base for the receipt and distribution of commodities, supplies and resources. IMT 2 (Zombro) is coordinating with other agencies to plan and prioritize emergency road clearing. FDNY IMT 2 (Kane) has been tasked with assessment of damage to critical infrastructure including roads, water systems and communications.

Hurricane Maria U.S Virgin Islands, Federal Emergency Management Agency (FEMA). IMT 2 (Bird) has mobilized to St. Croix and is managing a logistical staging area for incoming responders while preparing for FEMA operations. IMT 2 (Parrish) has mobilized to St. Thomas and is supporting the receiving and distribution of emergency commodities to aid in the relief efforts.

Hurricane Harvey, Texas A&M Forest Service. Texas IMT 2 (Hanneman) has mobilized to College Station, TX to support recovery and mitigation efforts, surveying impacts on local fire departments and distributing donated fire equipment.

Hurricane Irma Recovery – South Florida Parks, National Park Service. IMT 2 (Foust) is overseeing site assessment, debris cleanup and emergency stabilization within national parks in Florida, Georgia and South Carolina.

Northwest Area (PL 2)

New fires: 2
 New large incidents: 1
 Uncontained large fires: 3
 Type 1 IMTs committed: 1
 Type 2 IMTs committed: 2

Eagle Creek, Columbia River Gorge National Scenic Area. Transfer of command from IMT 2 (Harrod) back to the local unit will occur today. One mile south of Cascade Locks, OR. Timber. Minimal fire behavior. Road, trail and area closures in effect.

Chetco Bar, Rogue River - Siskiyou NF. IMT 1 (Schulte). Sixteen miles west of Selma, OR. Timber and brush. Minimal fire behavior. Road, trail and area closures in effect.

High Cascades Complex, (2 fires), Rogue River - Siskiyou NF. Transfer of command from IMT 2 (Johnson) back to the local unit will occur tomorrow. Nine miles northeast of Prospect, OR. Timber. Minimal fire behavior. Road, trail and area closures in effect.

Jones, Willamette NF. Ten miles northeast of Lowell, OR. Timber and grass. Minimal fire behavior. Area closures in effect.

* **Chumyon**, Okanogan/Wenatchee NF. Nine miles northeast of Leavenworth, WA. Timber and tall grass. Moderate fire behavior with wind-driven runs. Last report unless significant activity occurs.

***Additional wildfire information is available through the Geographic Areas at <http://gacc.nifc.gov/>

Predictive Services Discussion: The low pressure area and upper level trough will strengthen over the west and will lead to continued below average temperatures, valley rain, and high elevation snowfall across the Great Basin. Weak off shore flow will continue across California, so expect pockets of critical fire weather conditions across the central Valley and along the coast of Southern California. In the East, the strong ridge of high pressure will remain fully entrenched as hot, summer-like conditions continue along the East Coast from New Hampshire south into Florida. In Alaska, seasonal temperatures are expected. A passing front will bring valley rain and mountain snow to portions of the western Interior and the Chugach range.

UNBURNED FUEL BETWEEN YOU AND THE FIRE

Operational Engagement Category

It is important for firefighters to recognize unburned fuel between themselves and the fire as Watchout Situation #11. Often it is not possible or practical for direct attack on a fire. Before attempting indirect attack and any time the firefighter is in a position where there is unburned fuel between them and the fire, the following questions must be addressed immediately:

- Can you see the fire or are you in contact with someone who can? Discuss situations you might find yourself in where you are out in the green and cannot see the fire. What can you do?
- Is fire spread in a direction away from you? Do you consider the potential for fire spread? Are you safe if the wind switches?
- Will your position be defensible when the fire reaches you? Talk about what must be taken into account when building indirect line or approaching a fire through the green.
- Is your line anchored? Discuss how you anchor indirect line.
- Are your escape routes and safety zones adequate? What is adequate?
- Are weather indicators constantly changing?
- To reduce the risks:
 - Post lookouts
 - Consider a different location. Review situations where you constructed indirect line or approached a fire through the green and how you provided for your safety.
